

1 Specification-guided orchestration

1 User input

“A Japanese garden with cherry blossoms, branching paths, and a guardian Boss.”

2 GameSpec

- Theme and asset roles
- Exploration + combat
- Three camera modes
- Geometry and art criteria
- Shared capture contract

3 Artifact graph

4 Workflow orchestrator

- Dispatch specialist roles
- Select tools and providers
- Track dependencies
- Resume interrupted stages
- Diagnose scoped repairs
- Preserve failure evidence

2 Structure-aware asset synthesis

A Environment synthesis

B Character synthesis

3 Multi-gameplay world realization

4 Closed-loop quality control

Final outputs

Playable game world

Editable, interactive Unreal world

2 Gameplay modes

Exploration

Boss combat

3 Camera views

First person

Third person

2.5D

5 Aligned modalities
